

Antibacterial. Resistant. A desk like no other.

Our Aeon line allows you to configure and assemble a surface that looks stunning in matte black, feel amazing and soft to touch, and has brilliant features made possible by nano technology. Modules starting at \$99

European full oak Crafted to perfect

In our Heritage line, modules are made hand-inspected by a craftsman. A perfect warmth and luxury of tradition with us. Modules starting at \$139

The first truly modular desk system.

We combine utility, craftsmanship and perfectionism to create the only desk that gives you absolute freedom in organizing, upgrading and changing your workspace. With various models of modules with different functionalities available, you can create a surface that works the best for your needs.

Cool features embedded in

your desk surface.

Our different models of modules offer you different functionalities. Do you want to use your iPad as a second screen? Dock it right in your desk surface! Want to rotate the dock towards you? We've got you covered! We aimed to bring super practical features to you, and let you decide where you want to place their respective modules yourself. Do you put your phone to your right? Put your Qi Wireless Charging module to the right then! Is your monitor on the left side of your desk? Put the cabling hole module on the left!

Environmentally responsible by reducing waste

Currently there's a lot of material being just thrown away because the old desk got scratched in one place of the surface, it's leg broke, it's become too small or too big. The Modulos idea of owning a desk battles this wasteful practice. Why throw away good material and then cut down a bunch of trees for the new one, when you can replace only the part that you don't need or upgrade the whole thing?
